## ABOUT CRISP REGIONAL HOSPITAL

Situated in south central Georgia, Cordele and Crisp County combine the best of small town living with easy access to modern-day amenities. A thriving city, Cordele also retains its agricultural roots, an essential economic factor that still today plays a large role in its success. Crisp Regional Health Services is a jewel among South Georgia community health organizations, and we are determined to become better every year.

Crisp Regional Health Services oversees the award-winning, high-tech Crisp Regional Hospital, with a level 4 trauma center. Its comprehensive network of health and social service facilities includes a home health program, 143-bed nursing home, retirement home, hospice and homecare program, dialysis facility, and rural health clinics in bordering areas. More than 50 physicians practice within Crisp Regional Hospital, providing hospital and outpatient care in family medicine, obstetrics/gynecology, emergency medicine, and 20-plus other specialties and subspecialties. During the past decade, Crisp Regional has changed and expanded to keep pace with the dramatic advances in modern medicine and to meet the demand for new services in both the hospital and the growing central Georgia community. Throughout this growth, it has never lost the personal touch, compassion, and commitment to patient- and family-centered care at reasonable cost that have characterized Crisp Regional since its establishment in 1952.

## OUR MISSION

Our mission is to provide appropriate, quality care and assistance in maintaining good health in an efficient and caring manner to all who need our services and as near their home as possible.

# MEDICAL ONCOLOGY CAMPAIGN

After growth in patient volume the past few years, Crisp Regional Health Services is kicking off a campaign to make the Oncology Department more spacious and comfortable for patients and their families. Crisp Regional Health Services plans to renovate and update our medical oncology department. We will expand the number of treatment areas, increase privacy, purchase new equipment, and completely upgrade the department to better meet our patient and family needs.

## HOW WILL THIS RENOVATION HELP OUR PATIENTS AND THEIR FAMILIES?

We will be able to provide chemotherapy and other services in a beautiful, comfortable treatment environment—right here in Cordele. Because cancer patients often need daily treatment, our patients will have the best treatment possible without having to travel out of town. We will also provide a nice waiting area for family members who accompany their patients.

## HOW DOES THE SUCCESS OF CRISP REGIONAL HOSPITAL IMPROVE THE LIVES AND FUTURE OF LOCAL CITIZENS?

Excellent local health care and high caliber physicians drastically improve quality of life for us all offering exceptional health care without traveling outside of our community. Our newly renovated medical oncology department will improve privacy, convenience, renovated spaces, and clinical excellence for those in need.

## MOVING CARE FORWARD

Not only will this facility bring peace of mind to patients, but it will also help our experienced providers advance care to the next level.

In conclusion, we want our cancer patients enjoy the comfort and convenience of staying close to home without giving up access to the most advanced technology and cancer therapy techniques available. Our physicians are board certified and hematology/oncology trained and nursing and support staff concentrate on more than clinical aspects of cancer treatment. They also work hard to provide an atmosphere of love, support and respect to help patients and their families focus their own energies on fighting the disease.

## Why give and support Crisp Regional Medical Center?

We serve a low income and economically disadvantaged population who often delay or fail to get appropriate health care when needed. Our community depends on our excellent emergency room and cancer center to provide these life-saving services for all our residents. With donations and community support, we continue to be strong, provide excellent care, and are able to care for all our community family and friends. We strive for excellence, compassion and access. Please help us be successful.
